

POOJA VERMA

.NET Developer | SQL Server & ASP.NET MVC Specialist

Lucknow, India | +91 6388943172 | pv150489@gmail.com | linkedin.com/in/pooja-verma-aa0150239

PROFESSIONAL SUMMARY

Results-driven .NET Developer with 3+ years of experience building and maintaining enterprise applications across .NET Framework 4.8 and the .NET / .NET Core 6/8 stack with C#, ASP.NET MVC, ASP.NET Web Forms, Entity Framework, Entity Framework Core, and LINQ. Strong hands-on expertise in MS SQL Server database design and programmability — Stored Procedures, Views, Functions, Triggers, Joins, Indexes, Constraints, Referential Integrity, Transactions, and Locking — along with query optimization and defect resolution for high-volume, production-grade systems. Experienced in REST API (JSON) integration, Entity Framework/Entity Framework Core (LINQ)-based data access, Role-Based Access Control (Authentication & Authorization), and Agile delivery, consistently shipping on time with zero critical post-deployment defects.

TECHNICAL SKILLS

Database (MS SQL Server): Tables & Views, Joins, Stored Procedures, Functions & Triggers, CTEs, Normalization & Denormalization, Indexes, Constraints, Referential Integrity, Transactions, Query Optimization

Security: Authentication & Authorization, Role-Based Access Control (RBAC), SQL Injection Prevention

Backend: .NET Framework 4.8, .NET Core 6/8, ASP.NET MVC (API/MVC pattern), ASP.NET Web Forms, Web API, Windows Forms, C#, Entity Framework, Entity Framework Core, LINQ

API & Integration: REST API (JSON), ASMX API, SAP API, ERP Integration, Postman, Swagger

Frontend: Angular, HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, jQuery, AJAX

Architecture: SOLID Principles, MVC Pattern, Repository Pattern, Clean Architecture, Layered Architecture

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Visual Studio, VS Code, SSMS, IIS

Methodologies: Agile, Technical Specifications & Test Plans, Defect Tracking, Cross-functional Collaboration, Code Review, Mentoring

PROFESSIONAL EXPERIENCE

Software Engineer – .NET Full Stack | Vibrant IT Solutions Pvt. Ltd.

Apr 2025 – Present

- Architected and delivered scalable enterprise applications using .NET Core 6/8, ASP.NET MVC, Entity Framework Core, and MS SQL Server, reducing deployment effort by 30% through reusable, LINQ-driven component design.
- Developed and maintained government portal modules on ASP.NET Web Forms using Entity Framework and Entity Framework Core for data access, alongside newer ASP.NET MVC/.NET Core services.
- Designed and maintained SQL Server stored procedures, functions, and triggers to support transactional workflows, and monitored everyday system activity to provide production support.
- Set up and maintained CI/CD pipelines to automate build, test, and deployment workflows, shortening release cycles and reducing manual deployment errors.
- Integrated SAP APIs and RESTful (JSON) web services enabling real-time ERP data synchronization, eliminating manual data entry for 500+ daily transactions.
- Built dynamic dashboards and data-driven reporting modules, improving operational decision-making for Sales and Admin teams.
- Mentored junior developers on clean code practices, SOLID principles, and Git workflows, improving overall team delivery speed.

Software Engineer – .NET Full Stack | Cloudsect Solution Pvt. Ltd.

Dec 2022 – Mar 2025

- Developed and deployed 6+ enterprise-grade web and desktop applications on .NET Framework 4.8 (ASP.NET Web Forms/MVC) and .NET Core serving government bodies and industrial clients across Uttar Pradesh, preparing technical specifications and test plans for each release.
- Designed complex SQL stored procedures, CTEs, and triggers for high-volume datasets — applying indexing, joins, and query tuning — improving critical query performance by up to 40%.
- Used Entity Framework Core and LINQ for data access and query optimization across multiple modules, improving code readability and maintainability.
- Implemented Role-Based Access Control (RBAC) with Authentication & Authorization safeguards across multiple applications, ensuring secure and controlled workflows for 1,000+ users.
- Managed defect tracking, resolved production issues, and prepared system updates, maintaining zero critical post-deployment defects.
- Collaborated with QA, business analysts, and clients in Agile sprints, delivering projects on time.

KEY PROJECTS

Cane Development & Sugar Industry Portal – Govt. of Uttarakhand (Ongoing)

- Developing a departmental portal for the Sugar Industry & Cane Development Department, Uttarakhand on ASP.NET Web Forms with Entity Framework, covering Masters, Transactions, Enquiry, Calendar, Issuance, Payment, Reports, Users, and Factory/Society modules.
- Built MIS Master modules and Excel import functionality for bulk data upload and reporting, using Entity Framework for data access.
- Implemented season-wise (e.g., 2026–27) data segregation, role-based administrator login, and password-expiry security controls.

Stack: ASP.NET Web Forms, C#, Entity Framework, MS SQL Server, Bootstrap, JavaScript

Dham Pur Sugar – Sales Operations Platform (Ongoing)

- Engineered a full-cycle sales management system with multi-level access (Admin, Sales Head, Agent), approval workflows, and real-time status tracking.
- Built responsive, modular front-end views using Angular alongside ASP.NET Core, improving UI reusability and reducing page-load times.
- Optimized data retrieval logic using Entity Framework Core, LINQ, and SQL Server queries, improving readability and maintainability across modules.
- Integrated SAP APIs for automated ERP data synchronization, reducing manual reconciliation effort by 60%.

Stack: .NET Core, C#, Angular, Entity Framework Core, MS SQL Server, LINQ, Bootstrap, JavaScript, SAP API

Birla Dev Cane Management System (Ongoing)

- Built a field operations platform managing 10,000+ farmer records with attendance tracking, seed reservation, plot modification, and MIS reporting, backed by SQL Server stored procedures and triggers.
- Used Entity Framework Core and LINQ for data access layers, streamlining CRUD operations across modules.
- Implemented division-wise logins with role-based authorization for field officers and a centralized admin control panel for multi-region monitoring.

Stack: ASP.NET MVC, C#, Entity Framework, MS SQL Server, LINQ, Bootstrap, JavaScript

State Election Commission, UP and CEOUP Polling System

- Developed secure, high-availability online voting and polling systems for statewide elections on ASP.NET Web Forms (.NET Framework 4.8), implementing authentication, access control, and data integrity checks for election officials.

Stack: ASP.NET Web Forms (ASPX), .NET Framework 4.8, MS SQL Server, Bootstrap, JavaScript

ERMS (ULB & PRI), MPS Application, Dalmia Bharat Sugar, Wave Dev, Rapidkabaddi

- **ERMS V2, ULB and PRI, MPS:** Built multi-department Enterprise Resource Management Systems for UP government bodies on .NET Framework 4.8 and .NET Core, supporting 500+ concurrent users with role-based authorization.
- **Dalmia Bharat Sugar:** Developed Cane Development modules on ASP.NET Web Forms using Entity Framework with API integration, attendance reporting, indent management, and operational MIS reports.
- **Wave Dev:** Built a supply chain operations application for tracking Diesel, Indent, and Planting workflows with access control and real-time reporting.
- **Rapidkabaddi:** Delivered a real-time sports platform for live Kabaddi match score and statistics management.

Stack: .NET Framework 4.8, .NET Core, ASP.NET MVC, ASP.NET Web Forms (ASPX), ASMX API, C#, Entity Framework, Entity Framework Core, LINQ, MS SQL Server, Bootstrap, JavaScript

ERMS V2

- Developed and maintained a large-scale Enterprise Resource Management System (ERMS) for government departments, supporting workflow automation, employee management, approvals, reporting, and role-based access control.
- Implemented responsive front-end modules using Angular and integrated them with REST APIs (JSON) built in .NET Core.
- Used Entity Framework Core and optimized SQL Server database queries using LINQ, improving application performance to support 500+ concurrent users.

Stack: Angular, .NET Core, C#, Web API, Entity Framework Core, LINQ, MS SQL Server, Bootstrap, JavaScript

EDUCATION

B.Tech, Computer Science and Engineering — Himalayan Institute of Technology and Management, Lucknow | 2025

Diploma, Information Technology — Government Girls Polytechnic, Ayodhya | 2021

CERTIFICATIONS AND TRAINING

- eCareer Advancement Bootcamp (1 Month) — Medha
- Apprenticeship, Techpile Technology Pvt. Ltd. (Jul 2022 – Dec 2022): Hands-on training in ASP.NET MVC, JavaScript, Bootstrap, jQuery
